Reference

I will give it to you on request

Profile

I am looking for a full-stack developer position.

I am highly adaptable and has significant experience in building, designing, and maintaining websites and applications.

I like to find inconveniences in common life and resolve them from a software point of view. Turning thoughts into reality is the most attractive part of this industry.

Project

Furniture online store App

- PWA made with JavaScript that displays different types of furniture that can search through categories

Business card making App

- Business card making App built with React and Firebase to store business cards preparing for non-face-to-face situations.

Mushroom posting blog

- A CRUD application built with MEVN Stack that users can create, read, update, and delete the post about their Mushroom.

Experience

Republic of Korea Marine Corps

Combat Engineer

Mar 2016 – Dec 2017

- Experienced hierarchical relationships, which taught me **how to treat people**, and took initiatives to lead people.
- Participated in U.S. – Korea joint training, **harmonize the team** to understand and accept other cultures as a squad leader.

Busan Metropolitan Office of Education

Volunteer

Mar 2018 – Dec 2018

- Volunteered to teach **Arduino** to make an **autonomous** car for high school students.
- Took the initiatives to **communicate** between colleagues and students that increased my value to the team.
