Profile

I am a freshly trained frontend developer who is highly adaptable and has experience in building, designing and maintaining websites and applications.

I like to find technical inconveniences in common life and resolve them with clever code and thinking—turning thoughts into reality is the most attractive and satisfying part of this industry.

Technical Skills

- HTML / CSS / JS
- React
- Git / Github
- Rest API
- Figma

Education

Diploma in Web & UX design (Level 6)
Yoobee college
Feb 2021 - Dec 2021

Diploma in Web Development & Design (Level 5)
Toi Ohomai institute of technology
Feb 2020 - Dec 2020

Bachelor of Mechanical engineering
Busan National University

Project

Business card maker App
- Business card store app built with React and Firebase that users can update and create a business card in a real-time database.

Cryptocurrency App
- Cryptocurrency Website which people can have quick access to cryptocurrencies and related news.
- Using Redux to manage states and get data from two different APIs.

E-Commerce App (Team project)
- Working in a team to experience agile development process to make E-commerce CRUD Application. (MEVN stack)
- Proceed standup meetings and cooperate with team members from design to deploy process.

Experience

Republic of Korea Marine Corps

Combat Engineer   Mar 2016 – Dec 2017
- Experienced hierarchical relationships, which taught me how to treat people, and took initiatives to lead people.
- Participated in U.S. – Korea joint training, harmonized the team to understand and accept other cultures as a squad leader.
